• Organization Structure

Pansare Madam worked

1. Sharir Rachana Department:-

   This subject is concerned with the study of structure of human body & its parts i.e. human anatomy. It is included in the syllabus of 1 Year B.A.M.S. By studying this subject students can acquire deep knowledge about theoretical, practical & Clinical aspects of the parts of human body.

2. Sharir Kriya Department:-

   This subject unfolds the mistery of complex functional aspects of individual organ as well as tridoshas in the body. i.e.Human Physiology. It is regarding the mechanism of human body on which the survival of person is dependant. The knowledge of Sharirkriya is essential issue to understand the other allied subjects like Pathology (Rognidan & Vikruti Vigyan), Medicine (Kayachikitsa) etc.

3. Sanskrit Samhita Department:-

   The information about management of various disorders has been preserved in various Sanskrit classical texts by various sages (Rishi-Munis), Vaidyas & Scholars since time immemorable & its detailed understanding to learn Sanskrit language is very necessary factor. Therefore this subject is in corporated in 1 Year
BAMS syllabus. This department also provides knowledge about padarth vigyan, Ayurveda Itihas (History of Ayurveda), Ashtang Hridaya, Charak Poorvardha & Uttarardha. Therefore students can achieve the information about basic principles of Ayurveda.

4. Rasashastra & Bhaishiya Kalapna Department:

This subject deals with method of preparation of various formulations of Ayurvedic medicines. By studying this subject students can obtain comprehensive knowledge about formulations of Ayurvedic drugs and their properties.

5. Rognidan & Vikruti vigyan Department:

This department is related with human disease & their diagnosis. It is the scientific study of derangement of the structure & function of body in diseased condition. It includes the concept of disease phenomena i.e. causes, effects, mechanism & nature of disease. This subject is in the syllabus of III Year BAMS. It also includes testing of the affected part of body. The examination of urine, blood, sputum etc. & various methods of investigations are taught to the students under this subject.

6. Agadatantra Department:

This subject is concerned with the study of cause of death. It also deals with medical knowledge of law in relation to the practice aspects of law. Therefore students get education about the medical legal investigation of death. This subject is having important role to determine the cause & manner of death. The study of poisons i.e. Toxicology is also thought to the students.

7. Dravyaguna Department:

This subject deals with cultivation as well as conservation, dry specimens of plants parts. The complete identification information about medicinal plants, their properties, mode of action is given to the students. The students become familiar with the knowledge about Ayurvedic Materia medica i.e. Nighantus and Pharmacology.
8. Swasthvritta Department:

Epidemiology of communicable disease and also the application of this study to control the health problems is taught under this subject for preventing diseases, planning & improving effectiveness & efficiency of health services. Prevention is better than cure therefore study of Yoga, Pranayam, etc. are included in this subject.

9. Shalva tantra Department:

This department deals with the operative procedures according to the surgical indications. The students is made aware of basic principles, techniques of the procedures as well as they should possess a sound understanding of reasons applying these methods.

Therefore the critical as well as practical knowledge about this subject is provided to the students of IV Year. Also the information about successful results of research work regarding conquering diseases without surgery is given to the students under this department.

10. Shalakya tantra Department:

Under this department the management of diseases human organs viz. ear, nose, throat and teeth is performed. Also the research work is carried out on preventive measures useful for preventing these diseases and the positive and helpful findings are used in treating there diseases.

The students obtain the knowledge about the diagnosis of disease of ear, nose, throat & teeth their treatment & preventive measures under this subject.

11. Stree rog and Prasuitantra Department:

Feminine disorders and their treatments are taught under this department. The students acquire thorough knowledge about menstrual cycle, normal labor, prenatal, Antenatal & postnatal care, menopause etc. The required surgical procedures for females regarding genital problems, requiring surgical procedures are carried out in this department of Gynecology and Obstetrics.
12. Balrog Department:

This subject is related with the treatment of newborn babies and the children upto the age of 12 years. It also includes the preventive measures to maintain the child health and prevent them from being ill. Thus the health problems of children and their management are thoroughly taught to the students under this department.

13. Kayachikitsa Department:

This subject deals with human diseases, their correct diagnosis and treatment. Under this department the patients are treated by Ayurvedic therapeutic principles and methods. Clinical knowledge matures only at bedside in the clinical wards and never just by listening lectures or reading books.

Therefore not only theoretical but clinical & practical knowledge in the hospital is also given to the students.

14. Panchkarma Department:

Panchakarma is the special division of Ayurved. It is having its unique and holistic approach. It includes five types of therapeutics which are eliminative in action used for curing the human diseases viz. Vaman (use of emetics), Virechan (Use of Purgatives), Basti (Medicinal enemas), Nasya (Nasal administration) and Raktamokshan (blood letting). These procedures along with snehan (oleation Swedan (Fomentation), Abhyang (Masage) etc. are taught to the Students. The knowledge about research work carried out on there procedures & therapeutics is also provided to the students of IV year.
